Art Unit: 3611

## **DETAILED ACTION**

1. An Election was filed 8/10/05 in which <u>Claims 1-19</u> were elected without traverse. Claim 20 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claim.

- 2. The drawings are objected to because
  - a. "an <u>opening</u> on an undersurface of the lower gusset", Claims 5, 6, 18, 19, and, "<u>opening</u> on a top surface of the upper gusset", Claims 6 and 19, must be identified in the appropriate drawings.
  - b. The gussets "widening in a rearward manner" cannot be ascertained (Claims 2, 4, 12, 15-17).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency.

Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action.

The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/810,351

Art Unit: 3611

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claims 1 and 14, "the sidewalls <u>creating spaces</u> opened outward in crosssection" (emphasis added) is unclear, and cannot be identified.

In Claims 2, 4, 12, 15-17, "widening in a rearward manner" is not apparent from the drawings.

In Claims 6 and 19, "the headpipe unit has openings with each opening on a top surface of the upper gusset, and an undersurface of the lower gusset" is unclear because the "reinforcing members 31, 30d" appear to have these features, and not the gussets.

In Claims 7 and 10, "connecting portion" cannot be identified.

In Claim 9, "with an interval in the width direction" (emphasis added) is unclear.

In Claims 9-11, "the external face facing the inner/outer side in a width direction" is unclear.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsukahara 5353888.

Tsukahara discloses a frame for a motorcycle comprising Main frame 2 with

Reinforcing member\* 41, 42, (fig 5) with sidewalls 43, and connecting wall 42 (fig 3) having an external face in the portion that requires high strength, as broadly and reasonably interpreted.

Art Unit: 3611

- \* "forged" refers to a method of production; the manner in which this component is made is immaterial in apparatus claims.
- 5. Claims 2-13 and 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, and upon resolution of any 112 rejections. Prior art does not disclose the invention described above further comprising, *inter alia*, upper and lower gussets, and the reinforcing member comprising a downframe covering the lower edges of the lower gusset (Claim 2).
- 6. The prior art found pertinent to the disclosure, but not relied upon, includes: limuro 6679347, Adachi 6461522, Horii et al 6290015, Takasaka 5054571, Yamaguchi 4852678.

## 7. Communication with the Examiner/USPTO

Any inquiry concerning this communication, or others, should be directed to Ms. Lum at 571 272 6649, M-F, 9-5. If she can't be reached, her supervisor, Ms. Lesley Morris, may be reached at 571 272 6651. Our fax number is 571 273 8300.

Information re the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) System as follows: for unpublished apps - private PAIR only, for published apps - private or public-PAIR. For more info on-PAIR - http://pair-direct-uspto.gov. For more info on private PAIR - call the Electronic Business Center at 866 217 9197.
